In the whole world...

Life expectancy in different geographical areas

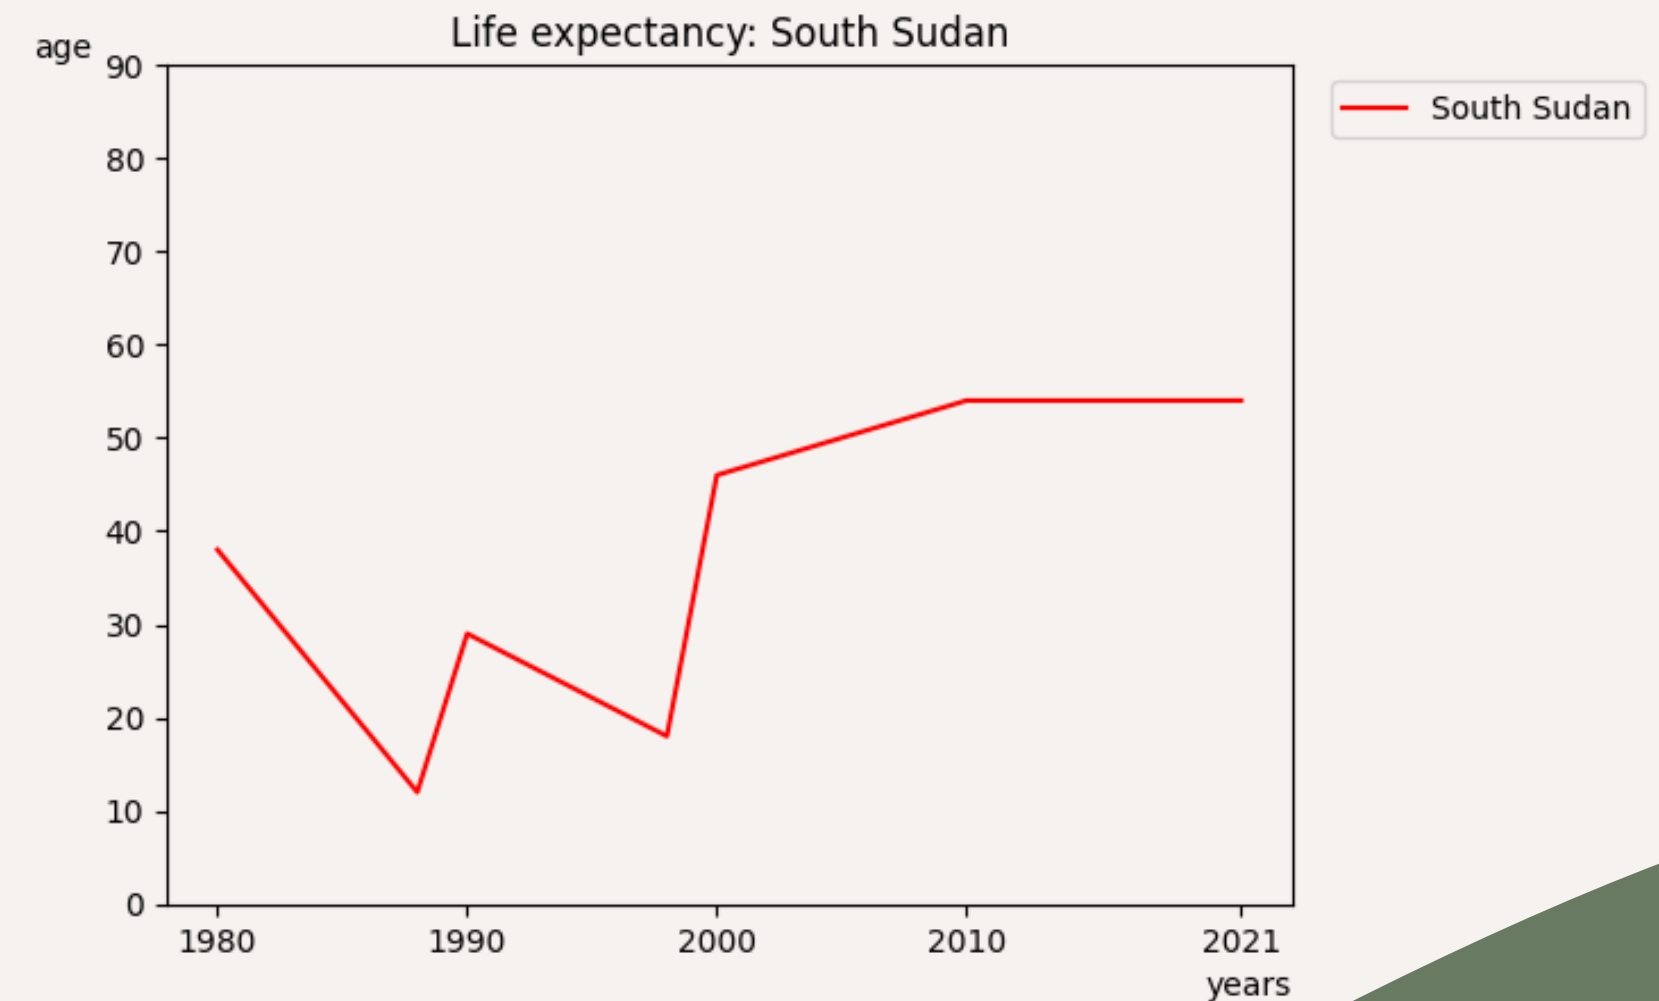

Let's focus on the worst african countries

- Central African Republic
- Chad
- Nigeria
- South Sudan

South Sudan

Sudan suffered 17 years of civil war (1955-1972), followed by a second civil conflict (1983-1998). In 1989, colonel Omar al-Bashir planned a coup d'Etat, proclaiming himself president. The civil war finished with a peace agreement that granted autonomy to the southern region. In 2011, a referendum ratified South Sudan's separation, occurred with Sudan's consent in July 9, 2011.

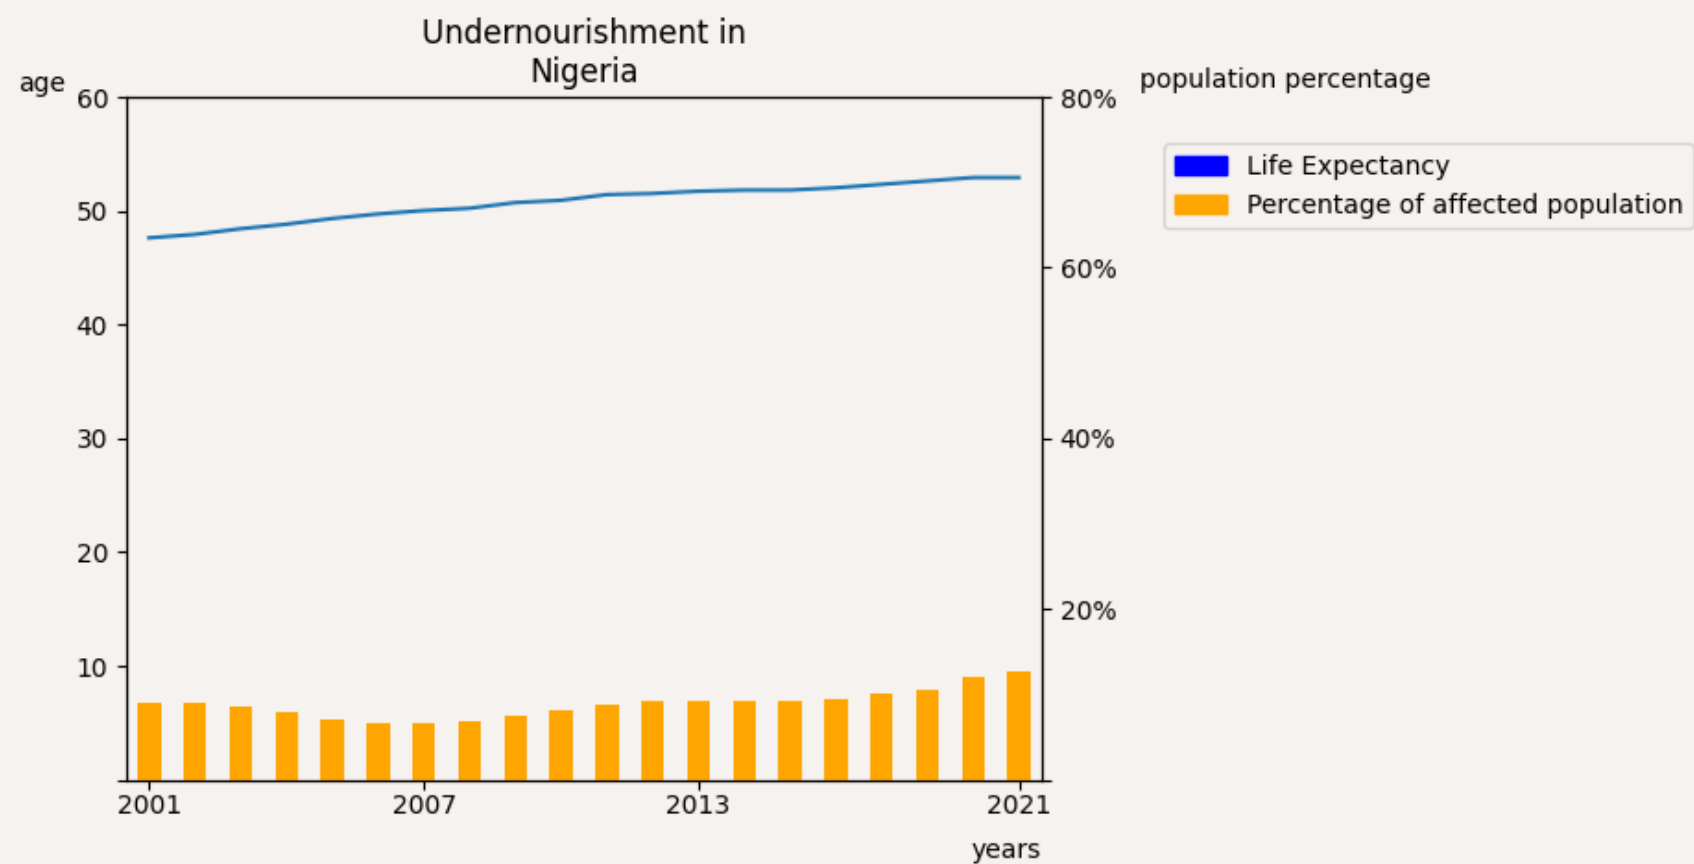

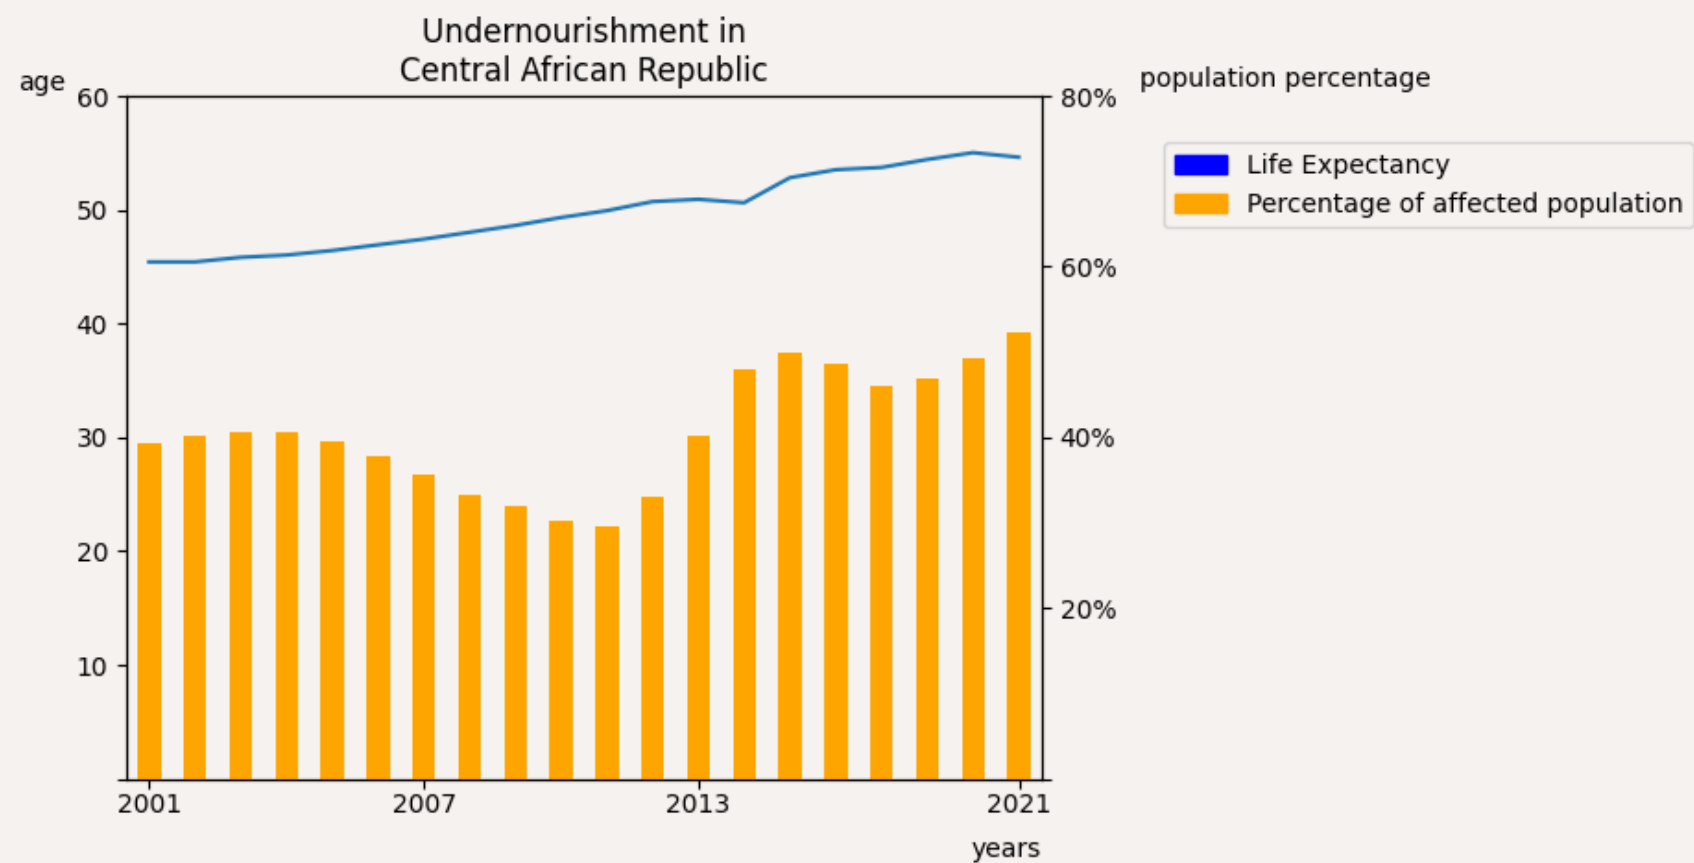

Factors affecting life expectancy

- Natural Disaster
 - Undernourishment
 - Hunger index
 - Diseases: Hiv, Malaria, Tuberculosis
- 

Natural disasters

Undernourishment

GHI

The Global Hunger Index (GHI) is a tool designed to comprehensively measure and track hunger at global, regional, and national levels, reflecting multiple dimensions of hunger over time

Undernourishment:

the share of the population whose caloric intake is insufficient

Child mortality:

the share of children who die before their fifth birthday

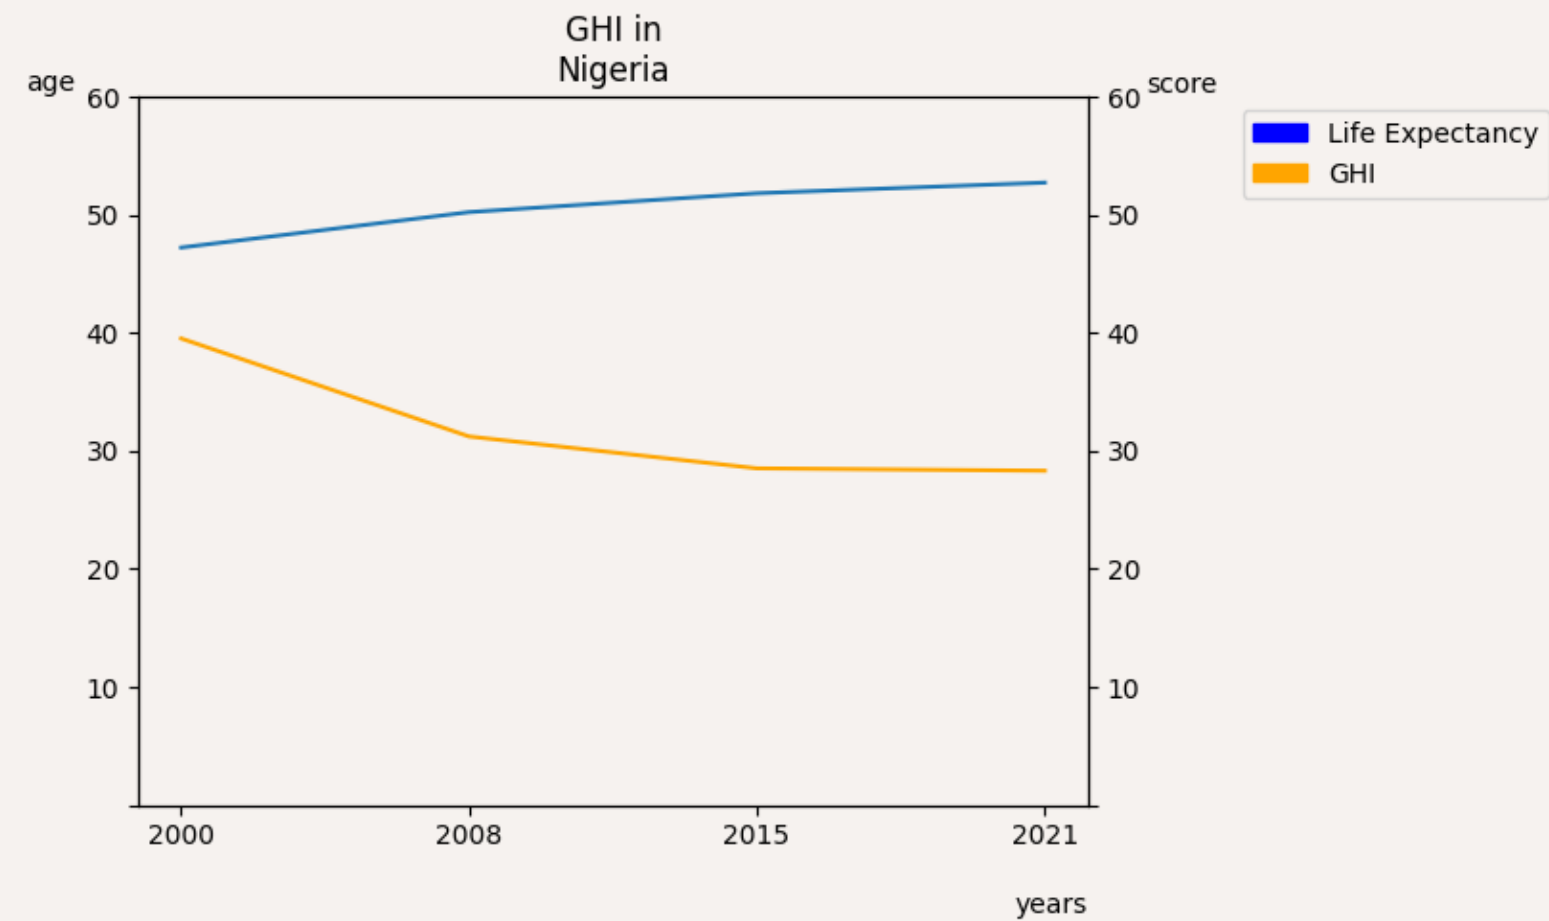

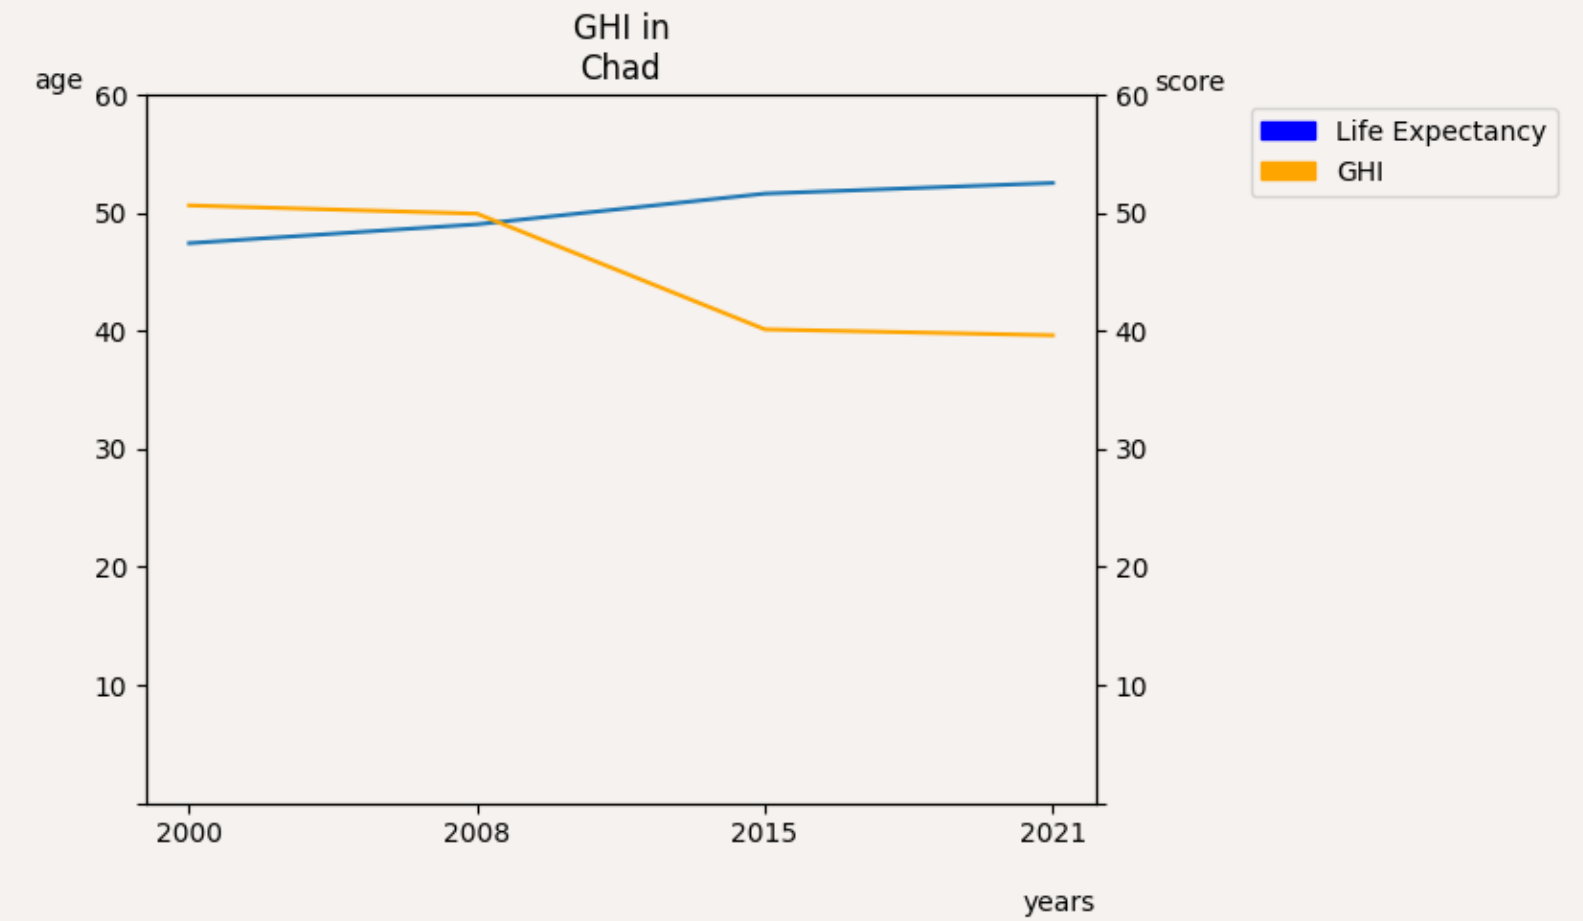

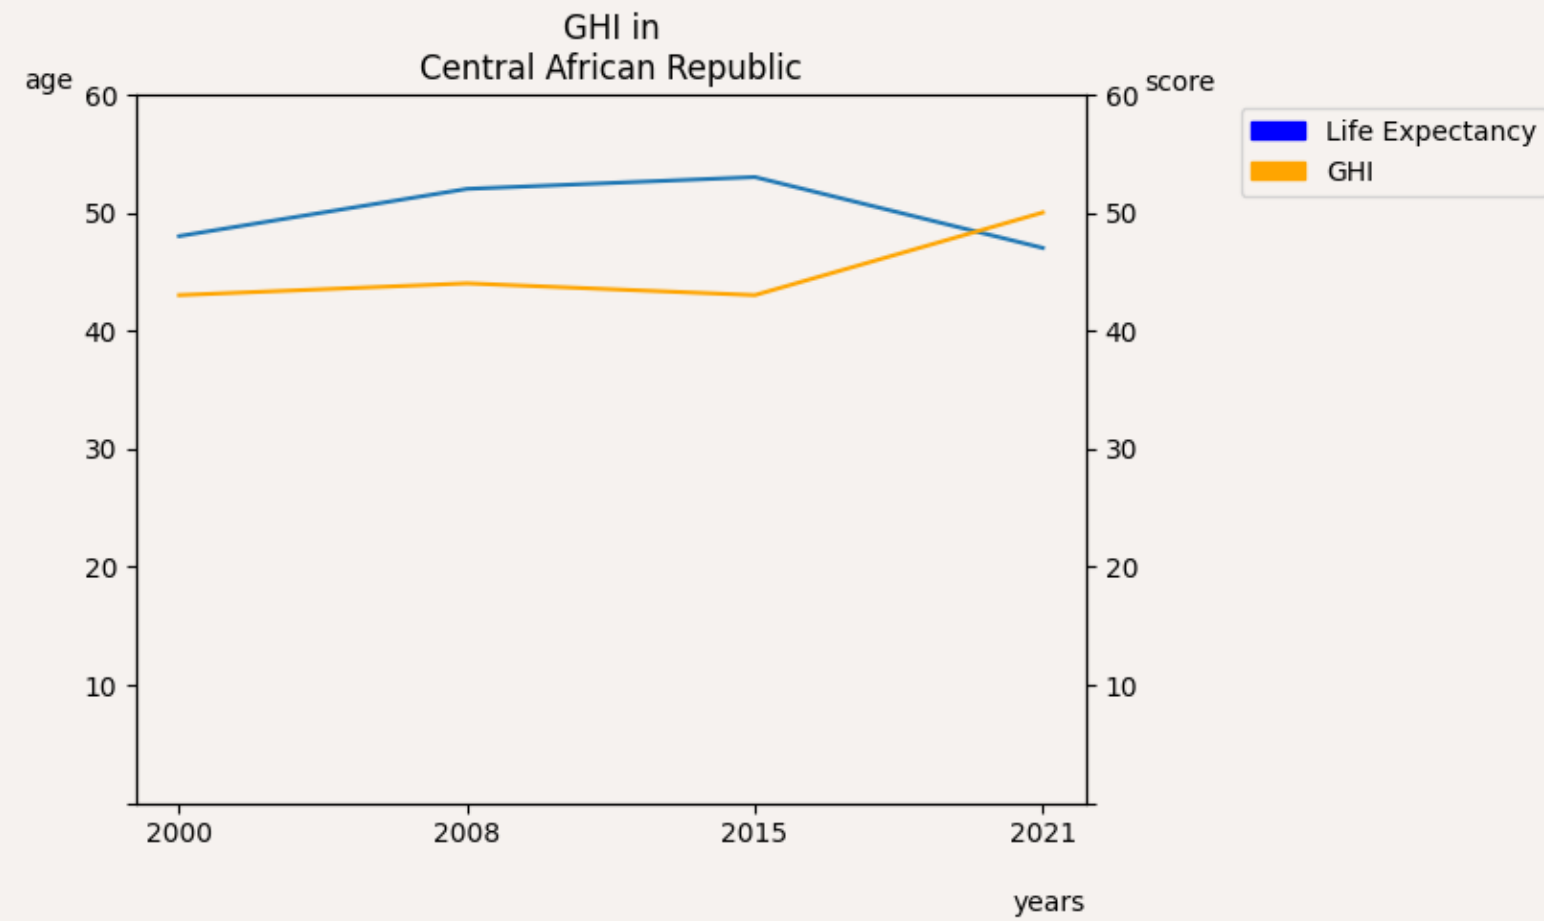

Child stunting:

the share of children under the age of five who have low height for their age

Child wasting:

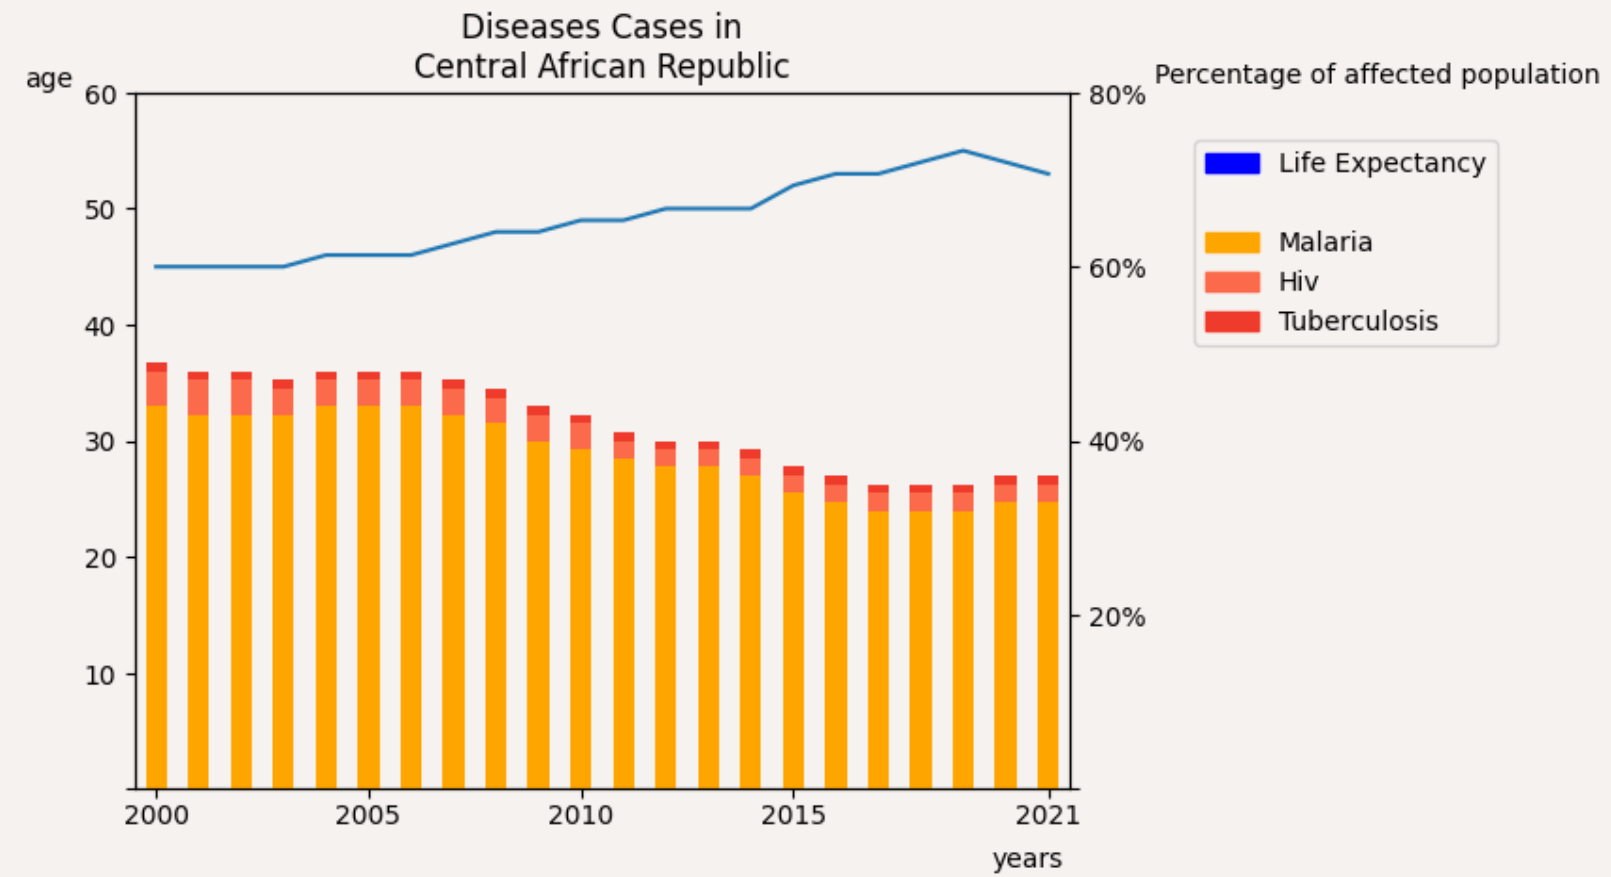

the share of children under the age of five who have low weight for their height

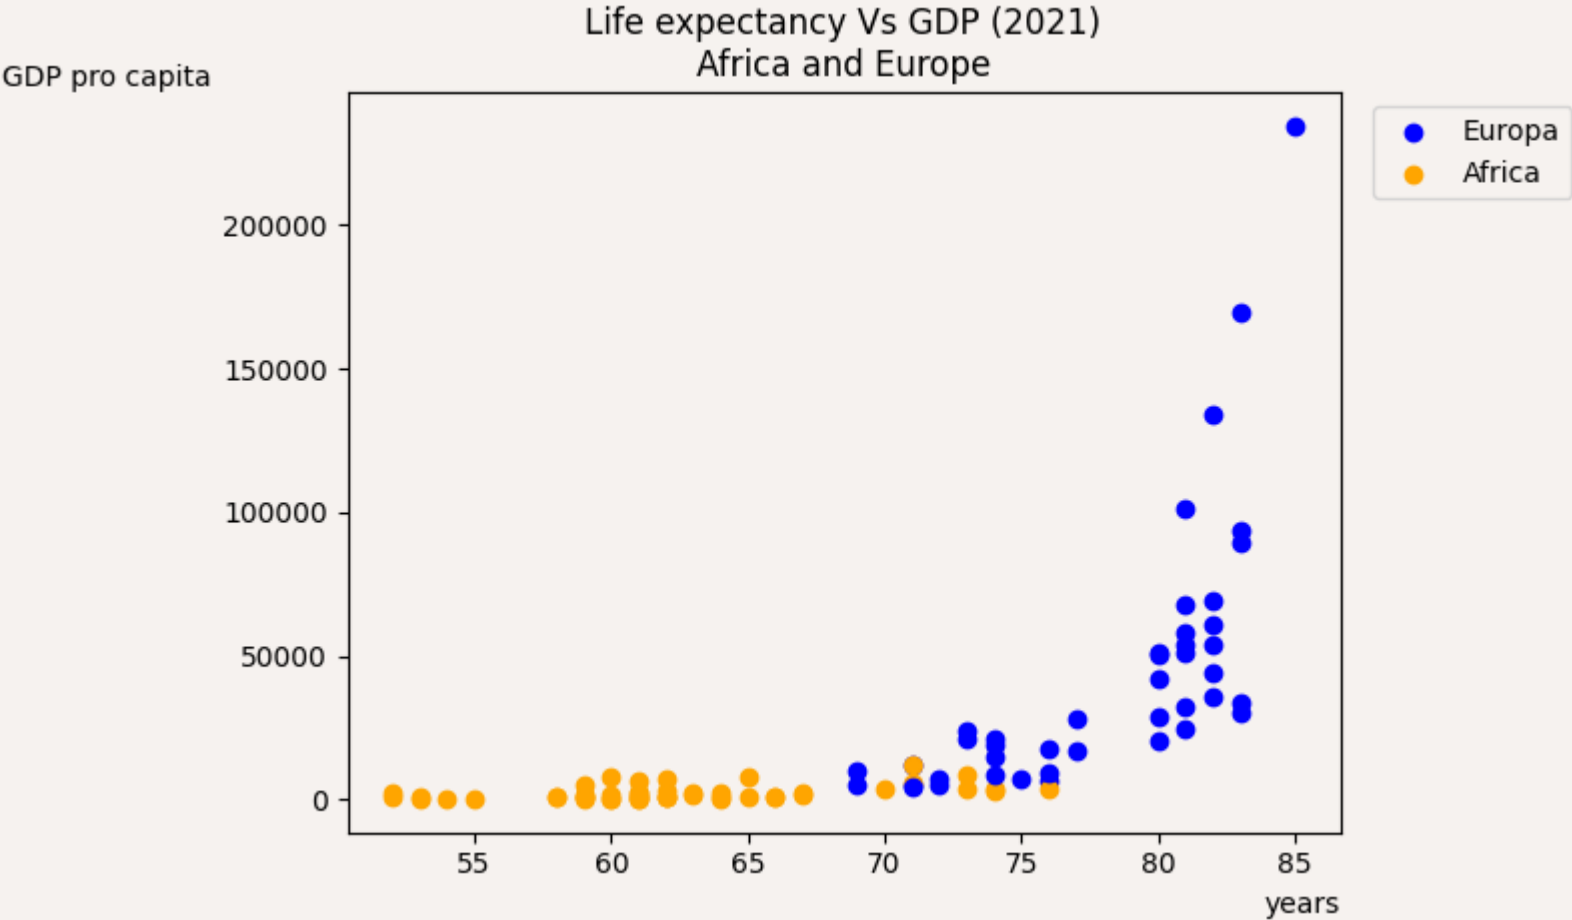

Hunger index

| Level | Value |
|--------------------|-----------|
| Low | 9.9 |
| Moderate | 10.0-19.9 |
| Serious | 20.0-34.9 |
| Alarming | 35.0-49.9 |
| Extremely alarming | ≥ 50.0 |

Diseases cases

Africa Vs Europa

GHI vs GDP

The total monetary or market value of all the finished goods and services produced within a country's borders in a specific time period
